

Overview of the STAXI-2 C/A Scales and Subscales*

Scale/Subscale**	Description
State Anger (S-Ang)	Measures the intensity of angry feelings and the extent to which a youth feels like expressing anger at a particular time.
State Anger-Feelings (S-Ang/F)	Measures the intensity of the angry feelings a youth is currently experiencing.
State Anger-Expression (S-Ang/VP)	Measures the intensity of current feelings related to verbal or physical expressions of anger.
Trait Anger (T-Ang)	Measures how often angry feelings are experienced over time.
Trait Anger-Temperament (T-Ang/T)	Measures the disposition to experience anger without specific provocation.
Trait Anger-Reaction (T-Ang/R)	Measures the frequency that angry feelings are experienced in situations that involve frustration and/or negative evaluation.
Anger Expression-Out (AX-O)	Measures how often angry feelings are expressed in verbally or physically aggressive behavior.
Anger Expression-In (AX-I)	Measures how often angry feelings are experienced but not expressed
Anger Control (AC)	Measures how often a youth tries to control the inward or outward expression of angry feelings.

*This state-trait conceptual structure has been strongly validated within youth populations around the world via over 70 studies. See the slides containing tables 1.2 and 1.3 in the [Power Point presentation overview](#) for detailed validity information. **The scales are in boldface, and the subscales are in normal typeface.
