

Thomas M. Brunner, Ph.D.

President: Dr. Brunner and Associates
Clinical, Forensic, and Consulting Psychology
Licensed Psychologist, State of Arizona
Licensed Psychologist, State of New Mexico

PROFESSIONAL RESUME: MAY 2019

Summary Profile –Forensic, Clinical, and Consulting Psychologist and Expert

Dr. Brunner's credentials include being senior author of a scientific psychological measure that has been adapted into 14 languages. He is on the approved forensic evaluator list for many organizations including the Pima and Maricopa County Courts, the University of Arizona Disability Resource Center, the University of Arizona Athletics Department, and the Arizona State Board of Nursing. Dr. Brunner is both an ongoing clinician as well as an evaluator, and is licensed in both Arizona and New Mexico.

Dr. Brunner has served as a court-ordered evaluator and/or expert witness in high stakes cases involving questions such as level of injury/impairment or trauma, disability, general mental health status, and numerous family law related issues demanding developmental expertise. Dr. Brunner's forensic reports have been used by the Departments of the Navy and Homeland Security, Federal Aviation Administration, Tucson Electric Power, and Carondelet Healthcare Network. He has served as a consultant to large companies, public and private schools, medical doctors and other healthcare specialists, and serves attorneys in both Arizona and New Mexico. Dr. Brunner has served as a teacher to psychiatry residents at Banner Medical Center.

Dr. Brunner also has in-depth forensic skill sets in child/adolescent assessment/treatment, adult assessment, and evidence-based treatment of both adults and children. His clinical experience includes work in a full spectrum of assessment and contexts, including rehabilitation, medical surgery, pediatric/medical, psychiatric, crisis, residential, and outpatient facilities. References available upon request.

Behavioral Science Measure Published:

Brunner, T. M. & Spielberger, C.D., (2009). *The State Trait Anger Expression Inventory, Second Edition, Child Adolescent (STAXI-C/A)*. Psychological Assessment Resources: Sarasota, Florida.

Measure Description: The STAXI-2 C/A is a 35-item youth self-report measure used with children/adolescents 9 to 18 years of age. This tool comprehensively but concisely assesses key clinical facets of anger and produces an "anger profile". Our tool has been used in forensic, school, clinical, medical, and athletic assessment and treatment contexts. The STAXI-2 C/A has been adapted into 14 languages including German, Mandarin Chinese, Urdu, Spanish, Farsi, Italian, Croatian, Turkish, Lithuanian, Serbian, Bosnian, Bengali, and Slavic.

General Publications:
